When you create a meeting request, it is typical and convenient to include the meeting location for the meeting or event. You can use the Address Book to find a conference room.

1. On the **File** menu, point to **New**, and then click **Meeting Request**. **Keyboard shortcut** to create a new meeting request; press CTRL+SHIFT+Q.
2. In the **Subject** box, type a description of the meeting or event.
3. To open the Address Book to see which rooms are available, next to the **Location** box, click **Rooms**.

To...	
Subject:	
Location:	<input type="text"/> <input type="button" value="Rooms..."/>
Start time:	Wed 12/31/2008 <input type="button" value="v"/> 11:00 AM <input type="button" value="v"/> <input type="checkbox"/> All day event
End time:	Wed 12/31/2008 <input type="button" value="v"/> 12:00 PM <input type="button" value="v"/>

If you don't see the **Rooms** button, you might have:

- Opened an appointment instead of a meeting request.
- Clicked **New** on the toolbar instead of opening a meeting request on the **File** menu. By default, when in Calendar, clicking **New** on the **File** menu opens an appointment. In both cases, the **Rooms** button is not displayed until you add at least one other person. It makes the appointment into a meeting request. To change an appointment to a meeting request, on the **Appointment** tab, in the **Show** group, click **Scheduling Assistant**.

4. **Complete the meeting request and send it.**
