To provide agencies a seamless approach to Multi-Functional Device (MFD) ownership, State Print & Mail offers a new solution. The vision is designed to save agencies money, increase the level of customer service, simplify procurement of MFDs, and migrate to a true managed print solution.

NEW PARTNERSHIP ADVANTAGES

- 360 Office Solutions will service agencies at the Capitol complex and state-wide
- Expanded selections of MFDs as well as competitive pricing
- Utilizing software
  - track networked MFDs
  - streamlining maintenance and billing
  - detect toner levels, equipment jams and other maintenance problems
- Opportunity to have audits performed by 360 Office Solutions on current usages per MFD, providing valuable information on the possibility of reducing an agency’s environmental footprint (less equipment) while lowering their print costs

GOALS OF A MANAGED PRINT PROGRAM

- Optimize and manage the State’s leased printing and imaging devices, such as printers, fax machines, copiers, and scanners, by consolidating as many functions as possible into MFDs
- Provide significant cost savings by reducing the number of individual and network devices
- Encourage State of Montana participation in a cooperative purchasing effort. Increased participation equates to even more cost savings for the State
- Streamline the equipment procurement, IT setup, maintenance, and the service quality response process
- Establish a seamless and central management of the State’s print infrastructure that provides agencies with a more direct customer service experience and an increased ability through 360 Office Solutions to monitor cost performance

Contact Ryan Betcher, Program Manager from State Print & Mail regarding questions about this exciting new opportunity. rbetcher@mt.gov | 406-444-1833

CATALOG USAGE

- The catalog is broken into 6 machine categories, 3 color and 3 black only. To accommodate a variety of customers, there are additional products at the end of the catalog. Each category will have a base configuration and is illustrated for convenience. From the base unit, agencies can add or subtract accessories to better fit its needs. The total monthly lease or purchase price will be based on the accessories chosen for the machine. The total lease cost and click charge (per impression cost) will then be combined and billed to the agency monthly. Toner, service and maintenance on leased or purchased MFDs under this contract are included in the click charge.
- Each MFD placed by 360 Office Solutions will be assigned a unique A-number to be utilized when placing service calls. To facilitate the monitoring (i.e. toner levels, machine status and billing) any MFD placed should be connected to the State’s network if possible. MFDs not connected to the State’s network will require a key contact per device location responsible for submitting monthly meter readings and placing service calls.
- Pricing in this catalog is intended as a reference guide only, please contact Ryan Betcher 406-444-1833 to review current lease rates.

ECOSYS

KYOCERA’s objective is to manufacture superior products with a low Total Cost of Ownership (TCO) and minimize the impact on the environment. ECOSYS printers incorporate a patented long life drum which is separate from the toner container, eliminating drum replacement when toner is depleted — and reducing landfill waste. ECOSYS printers provide a printing solution that incorporates long life consumables and one of the lowest costs per print. The operating costs of traditional cartridge-based printers can easily exceed many times the original purchase price during the life of the product.

Evaluate your printer costs today.

ECOSYS TECHNOLOGY

KYOCERA's objective is to manufacture superior products with a low Total Cost of Ownership (TCO) and minimize the impact on the environment. ECOSYS printers incorporate a patented long life drum which is separate from the toner container, eliminating drum replacement when toner is depleted – and reducing landfill waste. ECOSYS printers provide a printing solution that incorporates long life consumables and one of the lowest costs per print. The operating costs of traditional cartridge-based printers can easily exceed many times the original purchase price during the life of the product.

ECOSYS

KYOCERA’s objective is to manufacture superior products with a low Total Cost of Ownership (TCO) and minimize the impact on the environment. ECOSYS printers incorporate a patented long life drum which is separate from the toner container, eliminating drum replacement when toner is depleted – and reducing landfill waste. ECOSYS printers provide a printing solution that incorporates long life consumables and one of the lowest costs per print. The operating costs of traditional cartridge-based printers can easily exceed many times the original purchase price during the life of the product. Evaluate your printer costs today.

ECOSYS TECHNOLOGY
KYOCERA’s objective is to manufacture superior products with a low Total Cost of Ownership (TCO) and minimize the impact on the environment. ECOSYS printers incorporate a patented long life drum which is separate from the toner container, eliminating drum replacement when toner is depleted – and reducing landfill waste. ECOSYS printers provide a printing solution that incorporates long life consumables and one of the lowest costs per print. The operating costs of traditional cartridge-based printers can easily exceed many times the original purchase price during the life of the product.
